

## INNOVATION ALL AROUND

Many window panes are only connected to the frame in very few positions. Internorm uses FIX-O-ROUND technology as standard for a continuous all round fixing. The advantage of this technology lies in the continuous connection of the window frame with the glass pane. This improves stability, thermal insulation and soundproofing, burglary protection and functioning of the window for its entire lifespan.

FIX-O-ROUND technology

The welded sash frame is tensioned from corner to corner.

The glass pane is set into the frame and centred.

The remaining gap between glass and frame is filled with glue all around.

By fitting glass beads or cover beads the glue joint is covered.
